Burnishine Named Exclusive Distributor for CTP Pens

Lake Villa, Illinois; *April 2010*—Burnishine Products has been named the exclusive distributor of popular CTP addition and deletion pens manufactured by NW Image Technology. Effective immediately, the CTP1000 Deletion pen and the CTP2000 Long Run Addition pen—both popular since 1995 under other labels—carry the Burnishine name and are available exclusively through Burnishine dealers and distributors worldwide.

Announcing the distribution agreement, Burnishine Products President Roger Giza commented: “Burnishine was selected to distribute the pens by NW Image Technology because of the excellent and long-standing reputation Burnishine has in the marketplace, and because of our extensive distribution network. We are pleased to make these widely used correction products available everywhere Burnishine products are sold.”

The Burnishine CTP-1000 Deletion Pen is suitable for use on metal CTP and analog plates of virtually every type and brand. Each pen includes three tip sizes, which permit precision deletions. Pen tips are designed to reduce evaporation and extend pen life.

The Burnishine CTP-2000 Long Run Addition Pen is also suitable for use on every type and brand of metal CTP and analog plate. A Prep Tip on the pen desensitizes the plate by removing residual coatings. Two Addition Tips on each pen permit the press operator to make small and larger additions. Additions made with the Burnishine CTP-2000 last hundreds of thousands of impressions.

Since 1887, Burnishine Products has manufactured a broad line of pressroom and related chemical products, including plate chemicals, blanket and roller cleaners, fountain solutions, and a line of related cleaning products. All Burnishine products are manufactured in the United States.
