New Burnishine Website Details Nearly 125 Years of Service to the Printing Industry

Lake Villa, Illinois; *October 2011*—Burnishine Products has an entirely new website—www.burnishine.com—which details the nearly 125-year history of the company and describes the many products available to printers. Regardless of the process used—offset, flexography, digital, or screen printing—Burnishine offers printers products which streamline pressroom operations.

Announcing the new website, Burnishine President Roger Giza commented: “Although Burnishine has been in operation since late in the 19th century, our products continue to make life easier for printers day after day. Our new website fully describes our products, all of which are available off the shelf from Burnishine dealers, as well as our colorful history.”

Since 1887, Burnishine Products has manufactured a broad line of pressroom and related chemical products, including plate chemicals, blanket and roller cleaners, fountain solutions, and a line of related cleaning products. Offset, flexo, digital, inkjet, and screen printers will find many Burnishine products to facilitate production. All Burnishine products are manufactured in the United States.
