

Technical Bulletin #106

CTP1000 DELETION PEN WORKS GREAT WITH KODAK SONORA PLATES!

Kodak recently announced they are expanding manufacturing for their Sonora plate line due to increased demand. Kodak now has over 2700 printers worldwide using Sonora plates. This means you have even more opportunity to sell our CTP1000 deletion pens. Kodak verified CTP1000 works exceptionally well with their Sonora plates, and we have them in stock, ready for immediate shipment.

Key Features:

- Unique pen has 3 tips for extra control when making deletions.
- High quality components for safe, efficient application.
- Durable nylon chiseled tips for long lasting performance.

Key Benefits:

- Saves time and money! No need to buy and stock extra pens.
- Helps eliminate need to remake plates.

Note: Use KP4 Deletion Pens for Trillian, Thermal Direct, baked Electra XD, and unbaked Thermal Gold.

DIRECTIONS: Remove ink if necessary. Apply in circular motion with **light pressure**. Wipe with dry cloth/rag during the deletion process. This will allow fresh chemistry and quicker deletion times. When image is deleted, clean area with plate cleaner and resume printing.
