

Technical Bulletin #107

## **CTP1000 & KP4 DELETION PENS WORK WELL WITH ANOCOIL PLATES!**

Anocoil recently tested CTP1000 and KP4 deletion pens for compatibility with their CtP thermal, violet and no-process plates.

We are very happy to report Anocoil's technical staff found both pens worked equally well, and said our pens were the best they've tested! Deletions were performed quickly and easily. As a result of their testing, Anocoil plans to recommend our pens to their customers.

You can feel confident when recommending either CTP1000 or KP4 for use on these Anocoil plates:

- ❖ **N200 Thermal**
- ❖ **Verti No Process**
- ❖ **NuVio Violet**

Burnishine has both pens in stock, ready for immediate shipment. Please contact us if you have any questions, or visit our website, [www.burnishine.com](http://www.burnishine.com), for complete product information and GHS compliant SDS. Just click on the product links located on the deletion pen product page.
