

TECHNICAL BULLETIN #104

PLATE CLEANER GUIDELINES

With so many plates on the market, it can be difficult to figure out which plate cleaning product to recommend to your customers.

Plate Sav-Ur is still the plate cleaner to use for analog metal plates. **Plate Sav-ur is alkaline**, so while it is suitable for most traditional plates, it can blind or remove the image on CtP or aqueous plates.

CtP Plates - most need an acidic product to clean and desensitize. **Aqua Blue** cleans, desensitizes and removes light scratches, and can be used "on the fly".

Plate Care - finishes, cleans and preserves all metal plates.

<u>Type of Plate</u>	<u>Cleaner/Desensitizer/Scratch Remover</u>	<u>FCP</u>
Analog/conventional	Plate Sav-Ur - alkaline	Plate Care
CtP / aqueous	Aqua Blue - acidic	Plate Care

DIRECTIONS: Shake well! Apply evenly over entire plate. Reapply if necessary to remove ink. Buff dry and store plates.
