### For Immediate Release

## Burnishine Thumbs Up Exceeds New California VOC Standards

Lake Villa, Illinois; *March, 2014* —Burnishine Products' award-winning Thumbs Up Hand Cleaner exceeds new California VOC standards for hand cleaners that became effective January 1, 2014. New regulations require hand cleaners to contain 1% or less of VOC's. Thumbs Up comes in at 0.1%, well below the new limit. In addition, Thumbs Up uses micro scrubbers that are safe for the environment. Roger Giza, President of Burnishine, commented saying, "Printers can feel confident knowing Thumbs Up is an effective hand cleaner that is safe for them, and kind to the environment. Unlike some micro beads, ours are easily filtered out at water treatment plants."

Since 1887, Burnishine Products has manufactured a broad line of pressroom and related chemical products, including plate chemicals, blanket and roller cleaners, fountain solutions, and a line of related cleaning products. Offset, flexo, digital, inkjet, and screen printers will find many Burnishine products to facilitate production. All Burnishine products are manufactured in the United States.
