# AQUA BLUE®

## CLEANER, CONDITIONER & SCRATCH REMOVER FOR ANALOG, CTP, AND POSITIVE METAL PLATES

Aqua Blue is an amazing acidic cleaner, conditioner and scratch remover for most analog, CtP metal plates such as Fuji, Agfa, IBF, Southern Litho and Kodak, and positive metal plates. Aqua Blue makes your printing look better, saves you money by extending the life of your plates, and can be used on-the-fly.

### BENEFITS:

- ◆ Quickly removes ink—including UV - scum, light scratches, gum, and oxidation
- ◆ Makes plates more ink receptive and desensitizes plates for longer, higher quality runs
- ◆ Excellent for “on-the-fly” cleaning
- ◆ Provides sharper images and prolongs the life of the plate

**DIRECTIONS: SHAKE WELL!** Apply to entire plate with dampened sponge or cloth. Apply liberally. Rinse with clean water or with fountain solution mixture and resume printing. Repeat where necessary.

**DIRECTIONS FOR ON-THE-FLY CLEANING:** Spray directly on plate while press is running to remove piling, plugging and scum.

**PRINTERS PRIDE®**
