

Technical Bulletin #114

CTP2000 ADDITION PEN

Like **CPT1000 Deletion Pen**, Burnishine **CTP2000 Addition Pen** is unique. It has 3 tips which allows printers greater control when making corrections, and eliminates the need to stock more than one pen. **CTP2000** contains 1 prep tip and 2 correction tips. Our superior quality construction means pens last longer and are more durable than others on the market.

FEATURES

- 3 tips – one prep tip to desensitize plate surface and 2 correction tips
- Prep tip removes residual chemistry
- Works with most CtP plates
- High quality barrels, end caps and tips.

BENEFITS

- Gives printers greater control when making corrections.
- Desensitizes plate surface so addition fluid adheres properly.
- Saves money – no need to stock other pens, and improves plate life.
- Pens last longer and are more durable than other pens on the market.

DIRECTIONS: Use prep tip to open grain of the plate and to remove any contamination before applying addition fluid. Our unique addition formula adds images to the open grain of the plate, and will improve plate life.
