PUTZ POMADE®

The Original Roller and Blanket Cleaner and Deglazer. Cleans OPC drums too!

PUTZ POMADE is the original deglazer in the graphic arts industry! It is applied while the press is inked up, and works great for deep down cleaning and restoration of overused or neglected rollers. Putz uses microfine granules to remove all traces of ink and other contaminants from rubber rollers, and helps prolong the life of the rollers. Putz Liquidflow cleans and extends life of OPC drums on digital presses such as Xeikon.

FEATURES / BENEFITS:

- ◆ Prevents stripping and glazing
- ◆ Rejuvenates and reconditions blankets and rollers
- ◆ Extends roller life
- ◆ Non-flammable; non-toxic
- ◆ Can double OPC drum life
- ◆ Available as Liquidflow or Paste

DIRECTIONS FOR QUICK COLOR CHANGES OR ROUTINE MAINTENANCE: Apply a thin bead to rollers while press is inked up, and idle press for 3-5 minutes. Remove with your favorite roller or blanket wash.

FOR HEAVILY GLAZED ROLLERS OR RECONDITIONING: Apply to rollers while press is inked up and allow press to idle for 10-15 minutes. Remove with blanket or roller wash.

DIRECTIONS FOR CLEANING OPC DRUMS: Apply with a lint free cloth & wipe drum to remove toner particles. Rinse with damp soft lint free cloth to remove Putz Liquidflow and run about 50 sheets to prepare the unit for printing. Or buff prior to printing with a lint free cloth.
