

ADVANCED PRODUCTS FOR THE PRINTING INDUSTRY

ULTRAFOUNT® FOUNTAIN SOLUTION

FOR METAL, SILVER, OR LASER POLYESTER PLATES

Ultrafount was developed to instantly allow printers to reduce alcohol usage by **50%** the first time it's used! **Ultrafount** can easily allow printers to run alcohol free when used in conjunction with an alcohol substitute, or will allow your shop to run with minimal amounts of alcohol. **Ultrafount** helps maintain proper pH and conductivity, and is especially helpful in humid environments.

BENEFITS:

- ◆ Combats toning problems; helps ink dry faster
- ◆ Helps eliminate or reduce alcohol use
- ◆ Compatible with all presses and dampeners
- ◆ Low V.O.C.
- ◆ Dilute 1:32

DIRECTIONS: Mix 1 oz per quart or 4 oz per gallon. Reduce alcohol by 50%. After 2 or 3 weeks, reduce alcohol another 50%. This is a necessary step to recondition the rubber dampening rollers. Repeat this process until alcohol is eliminated or reduced to minimal quantities. **Note: conductivity readings will be lower with this product.**
